Application/Control Number: 10/678,991

Art Unit: 2833

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Wei Te Chung on January 16, 2004.

The application has been amended as follows:

Claims 2-13 and 15-18 have been canceled.

Claim 1, last line, the period has been changed to a semicolon and the following paragraphs have been inserted thereafter:

-- wherein the thickness of the first lengthwise wall is larger than that of the second lengthwise wall;

wherein the third mating section of the second lengthwise wall protrudes outwardly from an outer face thereof;

wherein the first mating section has a longitudinal dimension larger than that of the second mating section;

wherein the contacts comprise first contacts received in the first mating section for transmitting power, second and third contacts respectively received in the second and the third mating sections for transmitting signals;

wherein the contacts are substantially identical in structure and each contact comprises a contact portion with a curved contact end exposed in the central slot of the housing, a board retention portion extending outwardly from the housing,

Application/Control Number: 10/678,991

Art Unit: 2833

and a housing retention portion connecting the contact portion and the board retention portion;

wherein the board retention portions of the first contacts the second contacts and the third contacts are arranged in two rows, respectively;

wherein the board retention portions of the contacts are configured for pressfitting in holes of the printed circuit board;

wherein the base portion of the housing defines upper and lower rows of cavities communicating with respective passageways defined in the first and second mating sections and a row of slits communicating with respective passageways defined in the third mating section, and wherein the housing retention portions of the first and second contacts are retained in the cavities and the housing retention portions of the third contacts are retained in the slits; wherein the upper and lower rows of cavities are staggeredly arranged with each other;

further comprising a pair of guiding posts protruding from the base portion and a pair of board retention pegs protruding from the base portion and extending along a direction away from the guiding posts;

wherein the board retention pegs each have a plurality of protrusions extending along a lengthwise direction on a periphery surface thereof;

wherein said base portion defines a transverse dimension which is larger than another transverse dimension which is defined by said first and second lengthwise walls commonly. --.

walls commonly;

Claim 14, last line, the period has been changed to a semicolon and the following paragraphs have been inserted thereafter:

-- wherein said longitudinal dimension and said transverse dimension commonly define a smooth and uninterrupted rectangular periphery of the base portion with a complete linear edge on each side of said rectangular periphery; wherein the transverse dimension of the base portion is larger than another transverse dimension which is defined by said opposite first and second side

wherein said second side wall is thinned except a portion thereof receiving the second contacts;

wherein said second side wall defines a lower portion adjoining the base portion, said lower portion being thicker than other thinned portions. --.

The following is an examiner's statement of reasons for allowance: none of the prior art of record discloses or teaches all of the specifics of the combination of the housing and contacts as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary F Paumen whose telephone number is 703-308-1414. The examiner can normally be reached on Monday-Thursday.

Art Unit: 2833

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula Bradley can be reached on 703-308-2319. The fax phone number for the organization where this application or proceeding is assigned is 703-746-8503.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-306-3431.
